

For people
of all ages

Straight teeth and a beautiful smile can enhance self-esteem and self-confidence at any age, plus improve overall oral health. Ask your orthodontist how you can benefit from the Damon System.

It's never too late to look and feel great.

Treatment time: 18 months, 11 appointments

Pretreatment

Final

Damon System braces use a passive slide mechanism to maintain archwires within the bracket, allowing them to move more freely.

Innovative
Technology

Traditional braces

Other styles of braces use elastics or active clips that "bind" archwires in place.

Elastics and active clips can act like parking brakes, resulting in friction and pressure.

What makes the **Damon System** different ?

Extraordinary results

Beautiful faces and beautiful smiles

Outstanding comfort

Damon Clear™ bracket

Damon Q™ Bracket

Tie-less braces that don't need to be "tightened" and are gentle to the teeth and tissues.

High-technology, memory-shape wires that efficiently moves teeth and require fewer adjustments.

A clinically proven treatment approach that aligns teeth and enhances facial aesthetics.

DAMON SYSTEM
More than straight teeth

Research shows that a great smile and improved appearance add to a person's self-esteem and confidence — attributes that can enhance a person's life and lifestyle.

The Damon System employs a unique treatment philosophy that goes beyond straight teeth to create broad beautiful smiles.

We take into account each patients' face, profile and other factors, anticipating what patients will look like in their 40's, 50's and beyond.

The days of having braces tightened are over. The Damon System uses tie-less brackets that can reduce the pressure on your teeth, allowing the wires to move more freely.

Outstanding comfort, ultra smooth brackets ensuring enhanced comfort through treatment.

All patients treated with the Damon System.
