

“Not only are Symetri brackets comfortable, but I finally get to have braces without feeling self-conscious when talking and smiling in front of other people. A lot of people don't even realize I have them on my teeth.”

— Emily Boudreaux,  
Symetri Clear patient\*

CLEAR

Nearly Invisible  
Braces

Developed using advanced technology,<sup>1</sup> Symetri braces are clear and built for comfort and reliability to help give you the confidence of a beautiful smile.<sup>2-3</sup>

**symetri**  
CLEAR

## Nearly Invisible

Symetri braces are made of an advanced ceramic technology that allows the braces to blend seamlessly with various tooth shades. The brackets are resistant to staining, so your beautiful look remains throughout treatment.

Symetri's clear appearance also helps make optional colorful elastics look vibrant.

## Designed for Comfort

The smooth surfaces, rounded edges and the very low-profile height of Symetri were developed to help give you a comfortable experience from start to finish. At the end of treatment, the braces can be removed safely with minimal pressure and discomfort.<sup>2</sup>

## Resistant to Breakage

Symetri braces are strong and resistant to breakage.<sup>1</sup> This reduces the need for repair visits, which may minimize your time away from work or school.

<sup>1</sup> Data on file.

<sup>2</sup> Using Symetri Clear debonding instrument. Data on file.

<sup>3</sup> Reliability based on bracket bond strength.

All patients should seek the advice of an orthodontist.
